Subject: RE: Tower Standard Service Proposed Work Plan

Good Afternoon John,

I received REI's soil sampling plan dated June 24th, 2015 attached to your email. I have spoken with Bob and plan on participating in Monday's call at 1 pm.

Subject: Tower Standard Service Proposed Work Plan

Bob and Kristen

Attached is the proposed scope of work the Department received from REI associated with the investigation at the Tower Standard Service Site (BRRTS #03-64-127889) in Lac Du Flambeau. Please note that the Department has not approved the work plan which calls for initial round of soil boring to be followed by the installation of additional monitoring wells. We have a number of concerns over the proposed scope and would appreciate your taking a look at it and providing us with any comments or questions by July 17th. It would be helpful to receive a coordinated

response from EPA and the Lac Du Flambeau Band. Please let me know if that time frame works for you or if you have any questions.

We are committed to service excellence.
